

- Salt Spray (Fog) Chamber

If the supplier is not able to perform one or more of the tests, they shall seek support from an accredited third party lab approved by FCA and/or ISO-IEC 17025 certified.

## 8 APPROVED SOURCE LIST

Applicators listed in Table 7 MUST be used for processing fasteners, parts that have been surface hardened, parts with a tensile strength of 1040 N/mm<sup>2</sup> or greater, and parts with a hardness of HRC 32 or greater.

Potential applicators seeking Engineering Approved Source List approval will be reviewed only after the applicator has met a FCA Procurement and Supply business case per the requirements defined in CEP-11916 (EASL Approval Review Process, Electroplated and Inorganic Coatings).

For overseas sourcing, the first-tier part supplier is responsible for all requirements of this standard including selecting a capable, approved applicator and demonstrating the capability of the selected applicator to FCA Materials Engineering and Supplier Quality.

EASL Approved Applicators are subject to an EASL Update Audit Review every 3 years. To maintain EASL Approval Status, it is the Approved Applicator's responsibility to meet all the requirements for the EASL Update Audit Review within 90 days of notification by FCA Materials Engineering.

An EASL approved applicator must resubmit for EASL approval if the coating process is changed.

**Table 6 - Engineering Applicator Approved Source List – Suppliers of Approved Proprietary Processes**

Company	Company
Atotech Inc. Rock Hill, SC	Mechanical Coatings Corp. Sidney, OH
MacDermid, Inc. Waterbury, CT	Plating Systems & Technologies 317 N Mechanic St Jackson, MI 49201

**Table 7 - Engineering Applicator Approved Source List**

Materials covered by this standard shall only be purchased from those source(s) listed in this table when processing fasteners or heat treated components.

Supplier – NAFTA	Supplier - EMEA
All Service Metal Treating 185 Oakland St Trenton, NJ 08618	Growermetal S.R.L Via Nazionale, 3 23885 Calco (LC) Italy
