

E-MOBILITY HAS A NEW LOCK.

**GROWER
OHMLOCK®**

HIGH CONDUCTIVITY WASHER

Grower OhmLock is Growermetal's new exclusive fastening solution for electric mobility: a conical washer designed for battery pack applications.

With the perfect balance between electrical conductivity and corrosion resistance, this innovative bolted joint prevents damages, while maintaining smooth electric power flow.

GROWER OHMLOCK®

HIGH-CONDUCTIVITY WASHER

ELECTRIC MOBILITY HAS A NEW LOCK

Grower OhmLock® is Growermetal's new exclusive solution for electric mobility.

With the perfect balance between electrical conductivity and corrosion resistance, this innovative bolted joint prevents damages, maintains smooth energy flow and eliminates the risk of electric energy dispersion.

FEATURES AND APPLICATIONS

Grower OhmLock® is a conical washer designed for battery pack applications, aimed at maintaining low electrical resistance and high conductivity between the washer bearing surface and the bolt underhead.

MATERIAL

Carbon steel, quenched and tempered.

Screw / Mother screw

Washer /
Painted metal sheet

Underhead screw /
Washer
